Dimension Rapid Prototyping Machine

Share your concept, recreate a part or develop that new invention. With our Dimension SST 768 machine, you finally have access to the technology you need. STL files can be created in many 3D Cad programs, and print results as a working 3D ABS model. We also offer this service to non members.

Hold your next meeting or training at Club Workshop!!

Our conference room can be set up for lecture style meetings or casual get-togethers. The room holds approx. 24 participants for a traditional classroom style set up, more for informal gatherings. We are also able to accommodate larger groups in one of the other portions of the club for networking events, annual meetings, or parties.
